

Ian Kallel Ocumen

Full-Stack Developer | Mobile Engineer | IT Specialist

Binan, Laguna | 09760097680 | kallel.ocu@gmail.com | github.com | iankallocumen.vercel.app

PROFESSIONAL SUMMARY

Highly specialized BSIT Game Development Graduate from the University of Perpetual Help System-Laguna (Graduated June 12, 2026) with over 5 years of concurrent, hands-on experience engineering cross-platform mobile applications, full-stack web architectures, and interactive Unity 2D systems. Fuses an advanced, modern development ecosystem (React Native, React, Node.js, TypeScript, Tailwind CSS) with foundational enterprise IT infrastructure experience. Proven expertise utilizing Git/GitHub version control, Vite build optimization, and custom Windows environments to deploy production-ready applications.

FEATURED PROJECTS

StressBuster

JavaScript, Mobile App, Wellness

Mobile app designed to help users cope with stress through guided exercises and tracking.

Lakbay Tala

C#, 2D Game, Mobile

2D side-scroller mobile game based on mythology and history in Laguna.

Bayanihan

C#, 2D Game, Arcade

2D game inspired by Hill Climb Racing and the Filipino bayanihan tradition of moving houses.

Zero Breakdown

ShaderLab, 2D Game, Mechanics

Mechanic-themed 2D game teaching basic motorcycle and car maintenance knowledge.

Cogniville

C#, Education, Quiz Tool

Educational quiz tool for teachers and students covering Science, Math, English, Filipino, and general knowledge.

BLINKGAME

JavaScript, Horror, Web Game

Web horror game featuring a Weeping Angel enemy and Blink Mechanic.

SHL Game Center

TypeScript, Sports, Analytics

Web app for Swedish Hockey League with live scores, player statistics, and match analytics.

Personal Portfolio

TypeScript, React, Portfolio

Portfolio website showcasing resume, projects, and GitHub work with responsive design.

PROFESSIONAL EXPERIENCE

INDEPENDENT SOFTWARE DEVELOPER & IT CONTRACTOR | Remote / Freelance

Cross-Platform Mobile, Full-Stack & Unity Developer | Jan 2021 - Present

- Architect and deploy responsive cross-platform mobile apps using React Native, Expo, and TypeScript
- Design high-performance web interfaces using React with Tailwind CSS for modular, mobile-first styling
- Configure ultra-fast dev servers using Vite, optimizing HMR and compilation pipelines
- Enforce rigorous version control and documentation across all repos using Git/GitHub
- Engineer modular 2D interactive logic within Unity using component-driven C# scripting
- Construct scalable backend microservices and API layers using Node.js and Express.js

VIRTUAL CHAMPS GLOBAL (VCG) / 1 CALL CLOSERS | Remote / Offshore

Account Operations Specialist & Systems Intermediary | Jan 2026 - Apr 2026

- Drove premium gym subscription upsells by managing real-time CRM pipelines and identifying high-value account expansion opportunities
- Handled international client communications across complex account structures while processing high-volume transactions with precision
- Partnered with remote Western operations teams to refine outreach scripts, reduce friction, and lower churn rates
- Ensured complete data integrity across distributed platforms in a fast-paced, results-driven environment

SHIN-ETSU CHEMICAL CO. (OJT INTERNSHIP) | On-Site

IT Support & Hardware Specialist | Feb 2025 - May 2025

- Diagnosed and resolved hardware/software issues across enterprise workstations and network infrastructure
- Conducted system audits, asset inventory management, and preventive maintenance scheduling
- Assisted in deploying new workstations and configuring user environments for onboarding
- Provided direct end-user technical support and documentation for recurring issues

TECHNICAL SKILLS

Mobile & Game Engineering

React Native, Expo, Unity Engine, Unity 2D, C# Scripting, Mobile Hardware Integration

Web Development & Architecture

React, TypeScript, Node.js, Express.js, Tailwind CSS, HTML5, CSS3, JavaScript (ES6+), RESTful APIs

Developer Environment & Tooling

VS Code, Vite, Git/GitHub, Windows Terminal/Bash, npm/yarn, Postman

IT Infrastructure & Systems

PC Architecture, Hardware/Software Diagnostics, System Deployment, Asset Auditing

EDUCATION

Bachelor of Science in Information Technology - Specialization in Game Development

University of Perpetual Help System-Laguna | Graduated June 12, 2026

Core: Cross-platform React Native projects, full-stack React/Node.js web models, interactive C#/Unity 2D builds

Electives: Advanced Game Programming, Cross-Platform Engine Engineering, TypeScript & Modern UI, Database Systems, Network Architecture

CERTIFICATIONS

IC3 Living Online GS5

Certiport
Dec 2023

Unity Certified User: Artist

Unity Technologies
Dec 2024

TOEIC - Score 840 B2/C1 Level English

ETS
Passed 2025/11/22
